

Bipolar Forceps NON-STICK red – Mesh Tray System for Safe Storage and Transport

In connection with our bipolar **NON-STICK red** forceps, we offer a readily available solution for storage and transportation of the forceps.

The system includes **holding clips** allowing the forceps to be **easily fixed in place in the mesh tray** for effective protection of the instruments, **particularly the tips, during the entire processing cycle.**

A lid is also optionally available for the mesh tray, to be easily locked in place simply by folding down the tray handle
