

SURESTORE™

Endoscope Storage & Transportation

Dry & Store

CANTEL IS PROUD TO OFFER THE SURESTORE™ ENDOSCOPE STORAGE & TRANSPORTATION

British designed and manufactured by our experienced engineers and technical staff, the SURESTORE™ Endoscope Storage and Transportation solution offers cutting edge long-term 'active' aseptic storage and transportation of endoscopes (including GI and theatre-based scopes). Conditioned directly from an endoscope washer disinfectant such as RAPIDAER™ Endoscope Reprocessor, and completely negating the need for time consuming air drying, the SURESTORE™ Endoscope Storage and Transportation solution validates each scope for storage of up to 100 days.

The unique design and technology of the SURESTORE™ Endoscope Storage and Transportation solution provides a 'patient-ready' packaged endoscope within 10 minutes.

THE COMPLETE CIRCLE OF PROTECTION

As the global vanguard in infection prevention, **only Cantel delivers the Complete Circle of Protection**, a full-value, proactive partnership dedicated to helping you remove risk, streamline operational efficiencies and optimise your success.

DRY & STORE Bacterial growth poses significant risk to endoscopes during storage. Our Transport, Drying and Storage solutions are designed to protect valuable inventory, reduce cross-contamination touch points, eliminate moisture in the endoscope channels and control humidity. Higher humidity or moisture in endoscope channels is known to aid bacterial growth.

ENDOSCOPE STORAGE & TRANSPORTATION

SURESTORE™ Endoscope Storage and Transportation solution enables scopes to be easily prepared in advance for emergency situations, out of hours, weekend, and off-site endoscopy work. The scopes can be transported to various departments within a hospital, or to secondary sites, using the TRAVELSCOPE™ Transportation Case, or the TRANSCOPE™ Lockable Carts and STORASCOPE™ Lockable Carts.

- Validated storage for 100 days
- Independent monitoring system
- Reduced scope wear and tear
- Flexible transportation solution
- Fully traceable cycle data
- Quick and simple to use
- Secure and robust storage
- Space saving storage solution
- Independently validated by Biotech Germande
- Tested with multiple endoscope brands

PRODUCT SPECIFICATIONS

Model

SURESTORE™
Endoscope Storage & Transportation

Conditioning time (start to finish)

Approximately 8 minutes (lumen scopes)
Approximately 2 minutes (non-lumen scopes)

Dimensions

545mm (w) x 690mm (d) x 1220mm (h)
(960mm exc screen)

Power requirements

13 Amp 220 - 240V

Operating requirements

Completely mobile on
4 independently lockable castors

Installation space

Unit does not require any additional ventilation space and can therefore be positioned against a wall or between other equipment

Validation

Biotech Germande and NFS 98-030
