

CANTEL REPROCESSING REIMAGINED

IN KEEPING WITH OUR DEDICATION TO INFECTION PREVENTION

Coming Soon: RAPID Workflow — Optimise your reprocessing.

Cross-contamination and instrument damage is reduced with the new integrated workflow of **RAPIDAER™** Endoscope Reprocessor, **ENDODRY™** Drying and Storage System, and **CLEANASCOPE™** ADVANTAGE Transport and Storage System, as endoscope handling is greatly minimised.

RAPIDAER™

Endoscope Reprocessor, **ENDODRY™** Drying and Storage System and **CLEANASCOPE™** ADVANTAGE Transport and Short-term Storage System — the most advanced and proven technologies for increased efficiency and minimal footprint.

RAPID WORKFLOW

RAPIDAER™ Endoscope Reprocessor

Increase Productivity

- Reprocesses three scopes per hour
- Single bay design for complete install flexibility
- External scope loading for efficient throughput and reduced operator strain
- Compact footprint for maximum room capacity

Guarantee Safety

- Compliant with EN ISO 15883-1, EN ISO 15883-4
- Automated daily Thermal Self Disinfection cycle at >80° C as by EN ISO 15883-4
- Complete traceability through latest RFID technology
- Fully Independent Monitoring System (IMS)
- Remote diagnostics enable fast and efficient technical support and servicing, maximising reprocessor availability

ENDODRY™ Drying and Storage System

Ensure Safety

- Locking doors protect endoscope inventory
- Compliant with EN 16442
- Designed to use air for direct channel drying meeting ISO 8573-1 requirements
- Available in single-sided or pass-through models (front and back door) for separation of wet and dry areas

Increase Efficiency

- Colour touch screen display for quick identification of endoscope storage time
- Barcode scanner for complete traceability
- SMART Connect data interface with RAPIDAER™ Reprocessor and CANEXIS™ Integrated Workflow Solution for increased security
- Dries endoscopes within three hours (internal channels within one hour) and can be stored up to 31 days without an increase in microbial levels

CLEANSCOPE™ ADVANTAGE Transport and Storage System

- Protects your endoscopes by minimising direct handling and reducing contact with airborne contaminants during transport and short-term storage
- Sterile liners provide clear identification of "clean" or "contaminated" scopes
- Robust reusable trays easily fit RAPID Workflow load carrier and help prevent damage to equipment
- Hard lids available for added protection
- Available in 5, 6 and 10 tray options
